## XII National Congress - Italian Group of Forensic Pathology

### FORENSIC AUTOPSY RELOADED *The legacy of the Magister in the Artificial Intelligence Era*

*Dear Colleagues,*

for the first time since the foundation of the Italian Group of Forensic Pathology (GIPF), the Triennial National Congress will take place from 16<sup>th</sup> to 18<sup>th</sup> April 2026 at the Aula Magna of the University of Pavia, the academic home of Professor Giovanni Pierucci, founding member and Emeritus President of the GIPF.

As anticipated by the title, *“Forensic Autopsy Reloaded. The Legacy of the Magister in the Artificial Intelligence Era”*, the 2026 edition will be dedicated to the memory of *Professor Pierucci*, a magister of legal medicine and forensic pathology, who was deeply rooted in autoptic and histopathological tradition, yet at the same time endowed with a modern vision, open to innovation and technological progress.

In continuity with previous GIPF National Congresses, the scientific program will be oriented toward multidisciplinary and the internationalization of forensic pathology. Speakers from National Scientific Societies (GeFI, GTFI, SIRM) and International Societies (IALM, ECLMF, JSML) will participate, contributing to in-depth discussion of highly topical and complex issues that require specific technical expertise and represent the present and future challenges of the discipline. To encourage participation and discussion with international colleagues, all presentations will be available in both Italian and English, with simultaneous projection of the translated slides.

The plenary session on Thursday, 16<sup>th</sup> April, will be dedicated to recommendations for good forensic practice in medicolegal autopsy. The work of the GIPF and GTFI Committees will be presented, focusing on cardiac examination in judicial autopsy settings and on post-mortem forensic toxicology laboratory analyses.

Friday, 17<sup>th</sup> April, will be entirely devoted to the multidisciplinary approach to medicolegal autopsy in minors - from neonates to adolescents - an uncommon but highly relevant field, characterized by significant complexity and social impact, often also attracting media attention.

Finally, the morning of Saturday, 18<sup>th</sup> April, will focus on future developments in the discipline, namely the application of artificial intelligence in forensic pathology and related sub-disciplines such as histopathology and imaging. The aim will be to explore the potential, limitations, and risks of integrating AI technologies into complex contexts such as the interpretation of traumatic injuries, reconstruction of criminal dynamics, estimation of the post-mortem interval, and drafting of the autopsy report.

Thanks to the valuable collaboration of the *Consulta Nazionale dei Giovani Medici Legali Universitari*, ample space will be dedicated to Residents, PhD candidates, and young Researchers, who will have the opportunity to present their scientific work through oral communications during the Friday and Saturday sessions or through poster presentations on free topics. At the end of the Friday afternoon session, the members' assembly will be held for the renewal of the Executive Board.

In keeping with tradition, there will be opportunities for social interaction: in addition to the welcome cocktail at the end of the Thursday session and the gala dinner on Friday evening, an event open to the public is scheduled for the evening of 16<sup>th</sup> April, entitled *“From the postmortem table to the screen: the representation of autopsy in cinema”*. This event will provide an opportunity to engage in dialogue with actors, directors, and film journalists on the sometimes central role of the medicolegal autopsy in cinematic storytelling, accompanied by the screening of iconic scenes from Italian and international films.

Confident that the proposed topics will foster fruitful exchange and contribute to the growth of our discipline, we look forward to welcoming you in large numbers in Pavia to pay tribute to the *Legacy of the Magister*.

Kind regards,

**Antonio Oliva**  
President, GIPF

**Giovanni Cecchetto**  
President, GIPF 2026 Congress

## XII National Congress - Italian Group of Forensic Pathology

### FORENSIC AUTOPSY RELOADED

#### *The legacy of the Magister in the Artificial Intelligence Era*

**Care Colleghe e Cari Colleghi,**

per la prima volta dalla fondazione del Gruppo Italiano di Patologia Forense, il Congresso Nazionale – a cadenza triennale – si svolgerà dal 16 al 18 aprile 2026 presso l’Aula Magna dell’Università degli Studi di Pavia, sede accademica del Prof. Giovanni Pierucci, socio fondatore e Presidente Emerito del GIPF.

Come anticipato dal titolo *“Forensic Autopsy Reloaded. The Legacy of the Magister in the Artificial Intelligence Era”*, l’edizione 2026 sarà dedicata alla memoria del Prof. Pierucci, maestro della medicina legale e patologo forense profondamente legato alla tradizione autoptica e istopatologica, ma al tempo stesso dotato di una visione moderna, aperta all’innovazione e al progresso tecnologico.

In continuità con i precedenti Congressi Nazionali GIPF, il programma sarà orientato alla multidisciplinarietà e all’internazionalizzazione della patologia forense. Interverranno relatori appartenenti a Società Scientifiche Nazionali (GeFI, GTFI, SIRM) e Internazionali (IALM, ECLMF, JSLM), che contribuiranno ad approfondire temi di grande attualità e complessità, richiedenti competenze tecniche specifiche e rappresentativi delle sfide presenti e future della disciplina. Per favorire la partecipazione e la discussione con i colleghi stranieri, tutte le presentazioni saranno disponibili in doppia versione, italiana e inglese, con proiezione simultanea della traduzione.

La sessione plenaria di giovedì 16 aprile sarà dedicata alle raccomandazioni per la buona pratica forense nell’autopsia medico-legale. Saranno presentati i lavori delle Commissioni GIPF e GTFI sull’esame del cuore in ambito autoptico giudiziario e sulle analisi di laboratorio in tossicologia forense post-mortem.

La giornata di venerdì 17 aprile sarà interamente focalizzata sull’approccio multidisciplinare nell’autopsia medico-legale del minorenne – dal neonato all’adolescente – un ambito raro, ma di grande rilevanza, complessità e impatto sociale, spesso anche mediatico.

Infine, la mattina di sabato 18 aprile sarà invece dedicata agli sviluppi futuri della disciplina, ovvero all’applicazione dell’intelligenza artificiale in patologia forense e nelle sub-discipline correlate, quali l’istopatologia e l’imaging. L’obiettivo sarà esplorare potenzialità, limiti e rischi dell’integrazione delle tecnologie AI in contesti complessi come l’interpretazione delle lesioni traumatiche, la ricostruzione delle dinamiche delittuose, la stima dell’epoca della morte e la redazione del verbale autoptico.

Grazie alla preziosa collaborazione della Consulta Nazionale dei Giovani Medici Legali Universitari, ampio spazio sarà riservato a Specializzandi, Dottorandi e giovani Ricercatori, che potranno presentare i propri lavori scientifici tramite comunicazioni orali nelle sessioni di venerdì e sabato o mediante esposizione di poster a tema libero. Al termine della sessione pomeridiana di venerdì si terrà l’assemblea dei soci per il rinnovo del Consiglio Direttivo.

Come da tradizione, non mancheranno momenti di convivialità: oltre al cocktail di benvenuto al termine della sessione di giovedì e alla cena di gala del venerdì sera, è previsto per la serata del 16 aprile un evento aperto alla cittadinanza dal titolo *“Dalla fantasia alla realtà: quando l’autopsia è un attore nel film”*. Sarà un’occasione per dialogare con attori, registi e critici cinematografici sul ruolo, talvolta centrale, dell’autopsia medico-legale nella narrazione cinematografica, con la proiezione di scene iconiche tratte da film italiani e internazionali.

Nella convinzione che i temi proposti possano stimolare una proficua condivisione e contribuire alla crescita della nostra disciplina, vi aspettiamo numerosi a Pavia per rendere omaggio all’Eredità del Maestro.

Un caro saluto,

**Antonio Oliva**  
Presidente GIPF

**Giovanni Cecchetto**  
President, GIPF 2026 Congress

FORENSIC AUTOPSY RELOADED

*The legacy of the Magister in the Artificial Intelligence Era*

18<sup>th</sup> April 2026

Aula Magna - University of Pavia

## Back to the future Forensic pathology in the era of Artificial Intelligence

Moderators: *Rossana Cecchi, Andrea Verzeletti, Guido Viel*

- 09:00 am** Artificial Intelligence: findings and perspectives  
*Claudio Cusano*
- 09:30 am** AI and time-of-death estimation:  
precision, accuracy, and limits  
*Ernesto D'Aloja*
- 09:50 am** The role of artificial intelligence  
in cardiovascular pathology  
*Cristina Basso*
- 10:10 am** The pathologist's virtual eye:  
AI and forensic imaging in the 21st century  
*Thomas Ruder*
- 10:30 am** Automation of the autopsy report:  
risks, potential, and application prospects in the use of AI  
*Nico Curti, Paolo Fais*

**10:50 am** *Coffee break - Magnolie Courtyards*

## Oral presentations

Moderators: *Roberto Demontis, Mariagrazia Marisei, Silvia D. Visonà*

- 11:10 am** Low voltage electron microscopy: practical advantages and forensic applications  
*Sara Bombardelli<sup>1</sup>, Jaromir Bacovsky<sup>2</sup>*  
*<sup>1</sup>Media System Lab, <sup>2</sup>Delong Instruments*
- 11:20 am** Artificial intelligence in forensic identification and age assessment:  
reliability, limits and professional responsibility  
*Jessika Camatti<sup>1</sup>, Valentina Bugelli<sup>1</sup>, Francesco Calabrò<sup>1</sup>, Laura Donato<sup>2</sup>,  
Rossana Cecchi<sup>3</sup>, Marco Di Paolo<sup>4</sup>, Lorenzo Franceschetti<sup>5</sup>*  
*<sup>1</sup>Parma, <sup>2</sup>Rome, <sup>3</sup>Modena, <sup>4</sup>Pisa, <sup>5</sup>Milano*
- 11:30 am** Digital quantification of fibrosis in the His bundle:  
a preliminary autopsy study using a commercial pattern recognition system  
*Davide Gorga<sup>1</sup>, Alessandro Feola<sup>1</sup>, Carlo Pietro Campobasso<sup>1</sup>, Giuseppe Parisi<sup>1</sup>,  
Giuseppe D'Abbronzio<sup>1,2</sup>, Emanuele Capasso<sup>1</sup>, Renato Franco<sup>1</sup>, Andrea Ronchi<sup>1</sup>*  
*<sup>1</sup>Napoli, <sup>2</sup>Aversa*

## XII National Congress - Italian Group of Forensic Pathology

### FORENSIC AUTOPSY RELOADED

*The legacy of the Magister in the Artificial Intelligence Era*

**11:40 am**

A deep learning approach of forensic interest for automated segmentation and classification of skin wounds caused by blunt, sharp or gunshot trauma

*Elena Lacchè<sup>1</sup>, Nico Curti<sup>1</sup>, Ester Cavalli<sup>1</sup>, Paolo Fais<sup>1</sup>, Guido Pelletti<sup>1</sup>, Filippo Pirani<sup>1</sup>, Susi Pelotti<sup>1</sup>, Arianna Giorgetti<sup>1</sup>*

<sup>1</sup>Bologna

**11:50 am**

AI in post-mortem cranial CT analysis of gunshot injuries:

a pilot study on multimodal LLM performance in gunshot wound investigation

*Laura Secco<sup>1</sup>, Stefano Palumbi<sup>1</sup>, Pasquale Padalino<sup>1</sup>, Eva Grosso<sup>1</sup>, Benedetta Trentarossi<sup>2</sup>, Veronica Sala<sup>2</sup>, Antonino Lavenia<sup>3</sup>, Giuseppe Mammola<sup>3</sup>, Giovanni Dal Lago<sup>4</sup>, Elena Giovannini<sup>4</sup>, Giorgia Rigano<sup>5</sup>, Salvatore Spatola<sup>5</sup>*

<sup>1</sup>Padova, <sup>2</sup>Pavia, <sup>3</sup>Modena, <sup>4</sup>Bologna, <sup>5</sup>Messina

**12:00 pm**

Digital pathology in forensic science: a systematic review of the literature with a focus on machine learning applications

*Gianmarco Argentiero<sup>1</sup>, Laura Ambrosi<sup>2</sup>, Federica Amirante<sup>2</sup>, Simona Nicoli<sup>3</sup>, Andrea Marzullo<sup>2</sup>, Giuseppe Ingravallo<sup>2</sup>, Davide Ferorelli<sup>2</sup>, Biagio Solarino<sup>2</sup>*

<sup>1</sup>Pavia, <sup>2</sup>Bari, <sup>3</sup>Roma

**12:10 pm**

AI-assisted forensic analysis of hanging-related ligature marks:

a pilot study using convolutional neural networks

*Giorgia Rigano<sup>1</sup>, Lucia Candela<sup>1</sup>, Dario Bruneo<sup>1</sup>, Salvatore De Caro<sup>1</sup>, Salvatore Ruben Spatola<sup>1</sup>, Sabrina Petralia<sup>1</sup>, Domenico Abramo<sup>1</sup>, Giorgia Burrascano<sup>1</sup>, Gennaro Baldino<sup>1</sup>*

<sup>1</sup>Messina

**12:20 pm**

Will artificial intelligence replace the forensic pathologist?

Inferential reasoning vs. correlational pattern-matching

*Andrea Costantino<sup>1</sup>, Martina Focardi<sup>1</sup>, Ilenia Bianchi<sup>1</sup>, Edoardo Orlandi<sup>1</sup>, Beatrice Defraia<sup>1</sup>, Maurizia Tiberio<sup>1</sup>, Simone Grassi<sup>1</sup>, Vilma Pinchi<sup>1</sup>*

<sup>1</sup>Firenze

**12:30 pm**

Discussion

**13:00 pm**

Presentation of best posters

**13:20 pm**

Prizes and closing remarks

XII National Congress - Italian Group of Forensic Pathology

FORENSIC AUTOPSY RELOADED

*The legacy of the Magister in the Artificial Intelligence Era*

From 17<sup>th</sup> April 2026 - 03.30 pm  
to 18<sup>th</sup> April 2026 - 01.00 pm

Aula di Disegno - University of Pavia

## Poster Session

Moderators: *Sara Sablone, Camilla Tettamanti*

### Pediatric Topic

A mother's love: the manual strangulation of a child by his depressed mother – A case report

*Robert Luta<sup>1</sup>, Sofia Incarnato<sup>1</sup>, Federica Lena<sup>1</sup>, Rosario Barranco<sup>1</sup>, Francesco Ventura<sup>1</sup>*

<sup>1</sup>Genova

Accidental mechanical asphyxia in unsafe sleep environments:

a multidisciplinary forensic approach to SUDI diagnosis in two infant cases

*Alessandro Paggetti<sup>1</sup>, Filippo Cortesi<sup>1</sup>, Elisa Esposito<sup>1</sup>, Manuela Mecarello<sup>1</sup>, Angelo Montana<sup>1</sup>*

<sup>1</sup>Ancona

Accidental pediatric deaths: forensic evaluation of airways obstruction and related fatal events

*Francesca Filippucci<sup>1</sup>, Francesco Paolo Busardò<sup>2</sup>, Loredana Buscemi<sup>2</sup>*

<sup>1</sup>Rimini, <sup>2</sup>Ancona

Cerebral venous sinus thrombosis in children: lessons from a rare and fatal case

*Beatrice Salsano<sup>1</sup>, Giuseppe Di Pietrantonio<sup>1</sup>, Isabella Caristo<sup>1</sup>, Francesco Ventura<sup>1</sup>*

<sup>1</sup>Genova

Dark web drugs and dangerous games

*Kiti Doci<sup>1</sup>, Gaetano Bulfamante<sup>2</sup>, Valentina Bugelli<sup>1</sup>*

<sup>1</sup>Parma, <sup>2</sup>Milano

Death of a newborn following a reported accidental fall:

abusive head trauma (AHT) or professional liability?

*Salvatore Ruben Spatola<sup>1</sup>, Guglielmo Catalioto<sup>1</sup>, Pietro Tarzia<sup>2</sup>, Barbara Russo<sup>3</sup>, Domenico Abramo<sup>1</sup>,*

*Lucia Candela<sup>1</sup>, Giorgia Rigano<sup>1</sup>, Sabrina Petralia<sup>1</sup>, Giorgia Burrascano<sup>1</sup>, Gennaro Baldino<sup>1</sup>*

<sup>1</sup>Messina, <sup>2</sup>Catanzaro, <sup>3</sup>Milazzo

Delayed diagnosis of post-intubation tracheal stenosis after short-term intubation

in a 7-year-old girl: a fatal case and medico-legal considerations

*Sabrina Petralia<sup>1</sup>, Giorgia Burrascano<sup>1</sup>, Barbara Russo<sup>2</sup>, Salvatore Spatola<sup>1</sup>, Pietro Tarzia<sup>3</sup>, Lucia Candela<sup>1</sup>,*

*Giorgia Rigano<sup>1</sup>, Domenico Abramo<sup>1</sup>, Gennaro Baldino<sup>1</sup>*

<sup>1</sup>Messina, <sup>2</sup>Milazzo, <sup>3</sup>Catanzaro

Delayed fatal outcome of healthcare-associated *Citrobacter koseri* meningoenophthalitis

in a preterm infant: forensic autopsy and medico-legal assessment

of a seven-month clinical evolution

*Elisa Messina<sup>1</sup>, Lucrezia Lombardi<sup>1</sup>, Margherita Birga<sup>1</sup>, Francesco Ventura<sup>1</sup>*

<sup>1</sup>Genova

## XII National Congress - Italian Group of Forensic Pathology

### FORENSIC AUTOPSY RELOADED

## GETTING THERE

The conference will be held at the University of Pavia, located in the historic center of the city, approximately 35 km south of Milan. The congress sessions will take place in the Aula Magna, in the Central Palace of the University, located in Piazza Leonardo da Vinci.

### **By plane**

The nearest international airports are Milan Linate Airport and Milan Malpensa Airport. From both airports, you can reach Milan city center and then continue to Pavia by train.

### **By train**

Pavia is well connected by frequent regional trains from Milano Centrale railway station and Milano Porta Garibaldi railway station. The journey takes approximately 30–40 minutes.

### **By car**

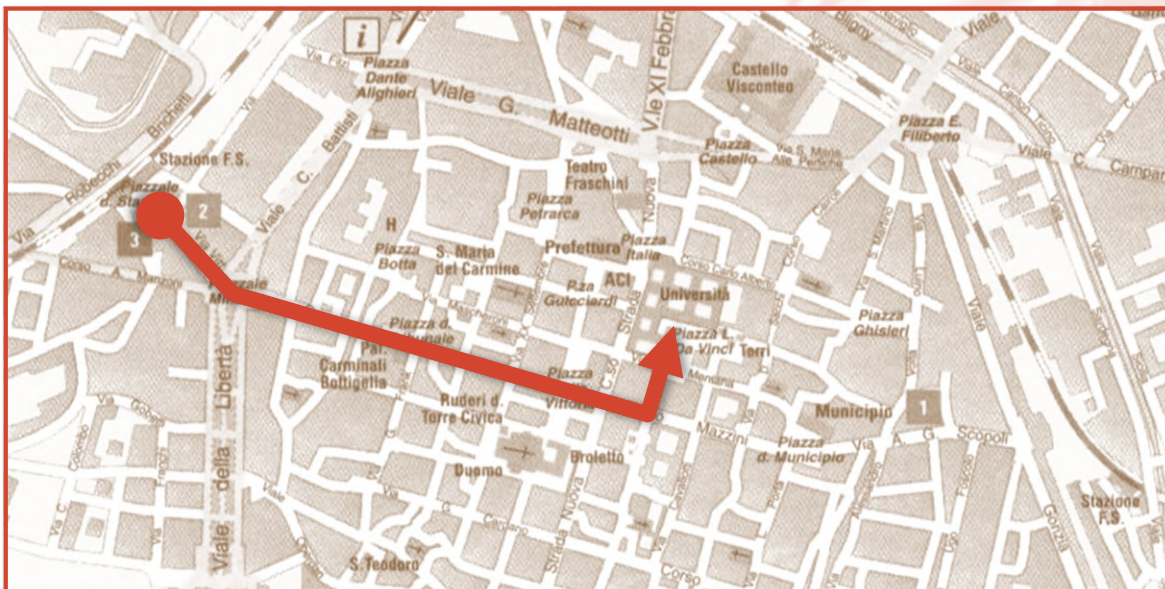

Pavia is accessible via the A7 motorway (Milan–Genoa). Exit at “Bereguardo–Pavia Nord” or “Pavia Sud” and follow signs to the city center.

Please note that traffic restrictions (ZTL) may apply in central areas.

### **Local transport**

From Pavia railway station, the university premises in Piazza Leonardo da Vinci can be easily reached on foot in approximately 17 minutes.

Local buses and taxis are also available outside the station.

## FORENSIC AUTOPSY RELOADED

*The legacy of the Magister in the Artificial Intelligence Era*

### Pavia and the Congress logo

The logo is conceived to provide a visual identity for the 12<sup>th</sup> National GIPF Congress, evoking both the city of Pavia and the topics addressed over the three days of the meeting.

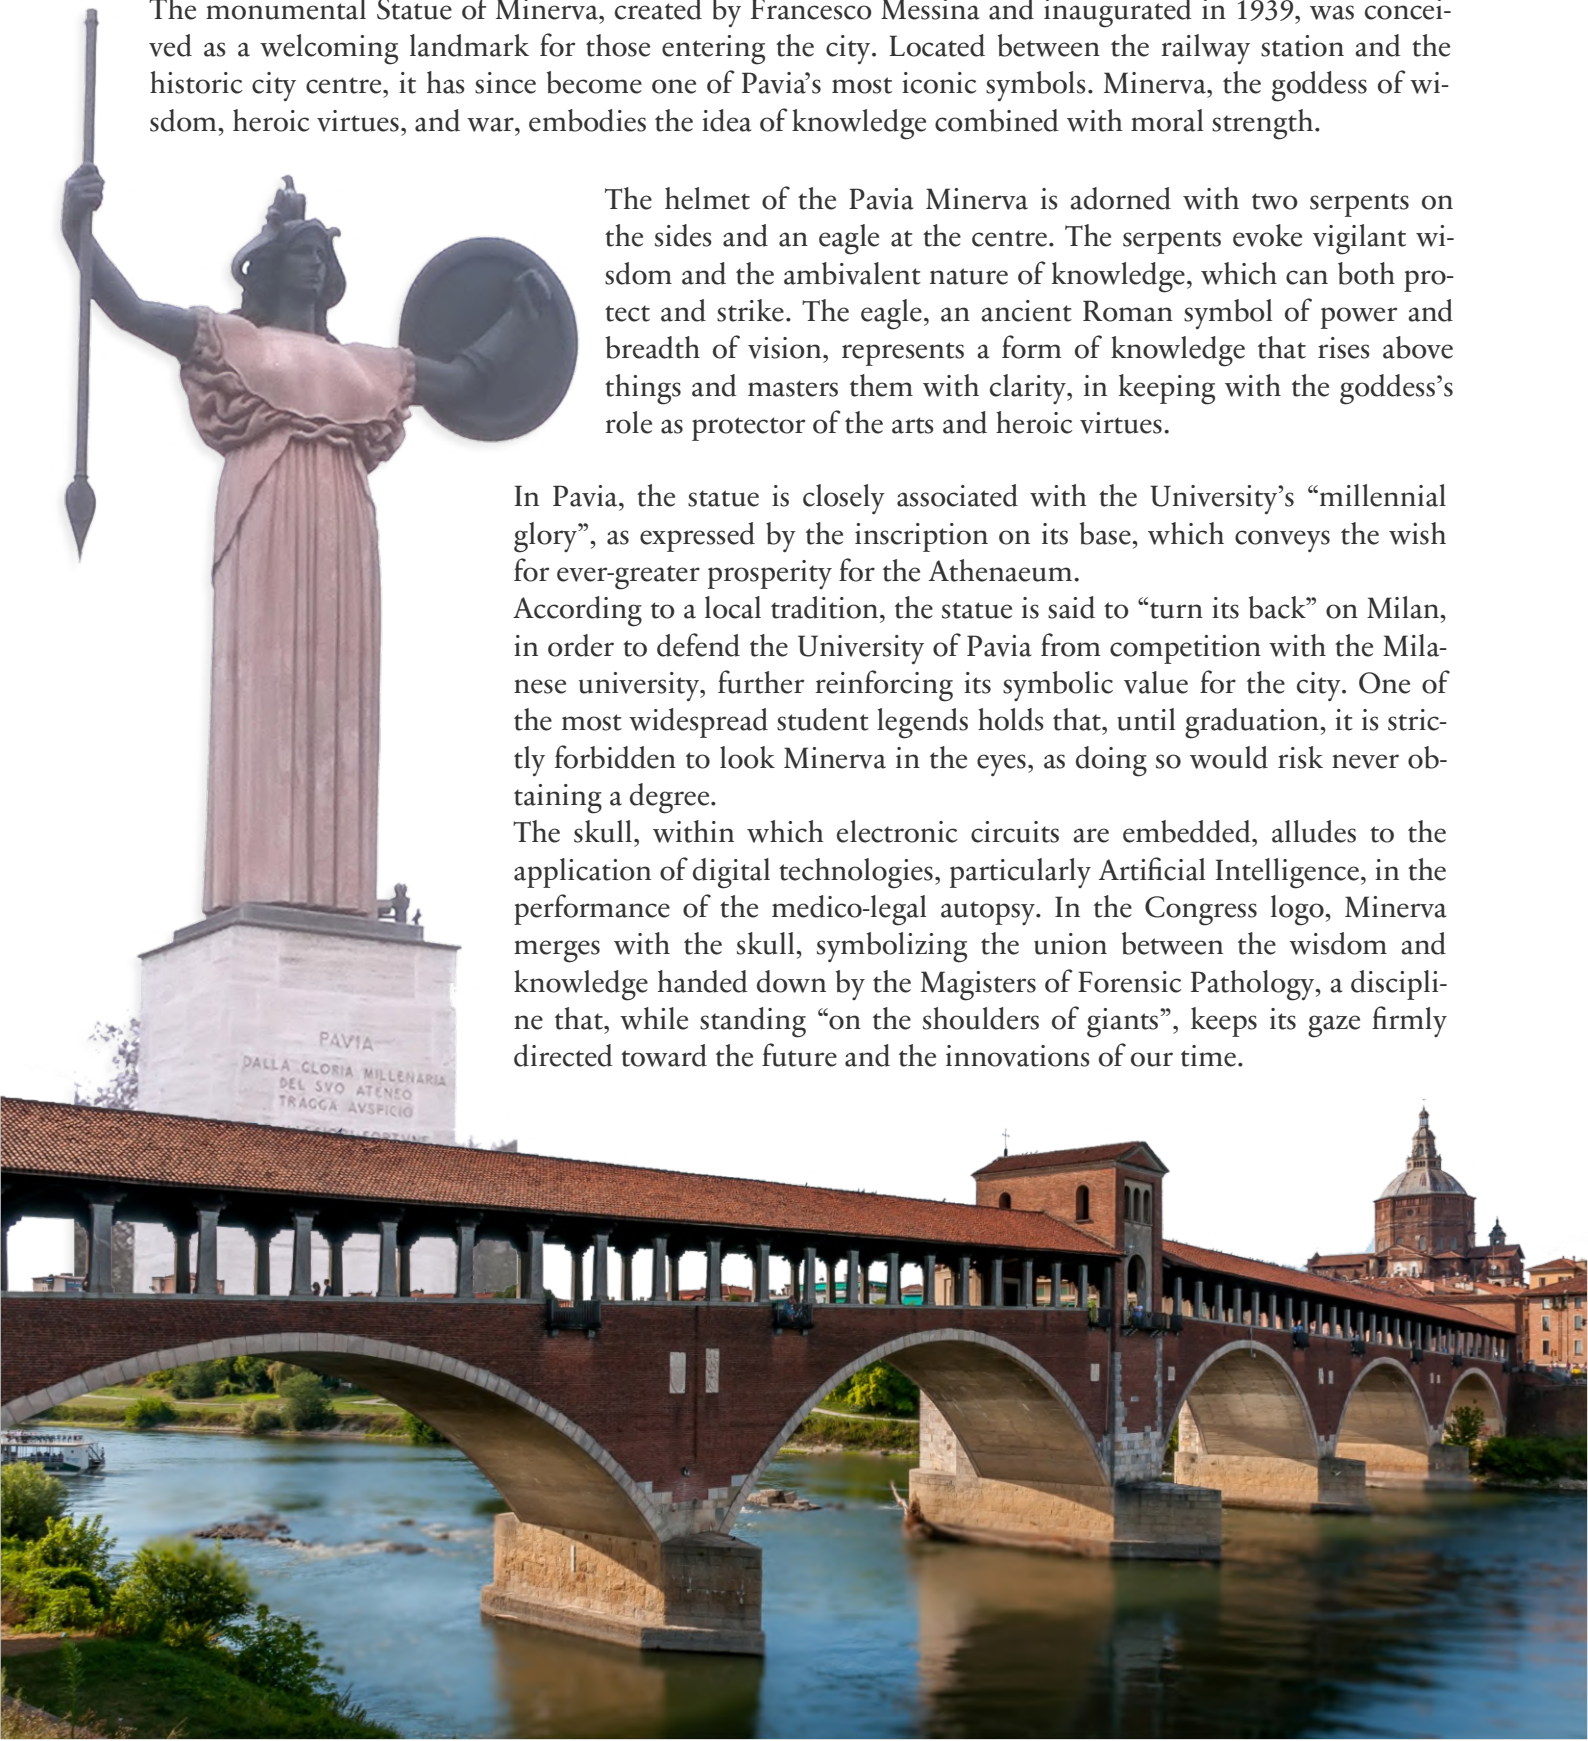

The monumental Statue of Minerva, created by Francesco Messina and inaugurated in 1939, was conceived as a welcoming landmark for those entering the city. Located between the railway station and the historic city centre, it has since become one of Pavia's most iconic symbols. Minerva, the goddess of wisdom, heroic virtues, and war, embodies the idea of knowledge combined with moral strength.

The helmet of the Pavia Minerva is adorned with two serpents on the sides and an eagle at the centre. The serpents evoke vigilant wisdom and the ambivalent nature of knowledge, which can both protect and strike. The eagle, an ancient Roman symbol of power and breadth of vision, represents a form of knowledge that rises above things and masters them with clarity, in keeping with the goddess's role as protector of the arts and heroic virtues.

In Pavia, the statue is closely associated with the University's "millennial glory", as expressed by the inscription on its base, which conveys the wish for ever-greater prosperity for the Athenaeum.

According to a local tradition, the statue is said to "turn its back" on Milan, in order to defend the University of Pavia from competition with the Milanese university, further reinforcing its symbolic value for the city. One of the most widespread student legends holds that, until graduation, it is strictly forbidden to look Minerva in the eyes, as doing so would risk never obtaining a degree.

The skull, within which electronic circuits are embedded, alludes to the application of digital technologies, particularly Artificial Intelligence, in the performance of the medico-legal autopsy. In the Congress logo, Minerva merges with the skull, symbolizing the union between the wisdom and knowledge handed down by the Magisters of Forensic Pathology, a discipline that, while standing "on the shoulders of giants", keeps its gaze firmly directed toward the future and the innovations of our time.
